

ATBRK Series

Features

The ATBRK Series incorporates a radial Duri-Flex™ high transmission optic between sloping acrylic panels providing the look and feel of a deep RDI luminaire — subtle soft indirect elements, interest and depth across the ceiling plane — with a kit that consumes minimal space and material. The contoured side panels of the unit are high transmission acrylic that provide a low-brightness glow, with the majority of the light controlled through the center optical element. For use with most recessed fixtures in standard 15/16" grid ceiling systems. Ideal for single lamp systems.

Specifications

Door Frame - Features positive latching mechanism for easy re-lamping.

Direct Optical Component - High reflectance optical engine delivers main beam focus through the revolutionary Dur-iFlex™ HT diffusing panel. With 93% transmission and 89% haze, the result is extraordinary control and efficiency. The radial curve reduces interior reflections and improves transmission. The Radial HT geometry is particularly suited for single lamp conversions.

Diffuser Surround - (2) Sloping high transmission acrylic diffuser panels manage contrast and generate soft, even, higher angle luminance.

Reflector - Multi-radii high reflectance white reflector distributes light through both optical elements.

Luminaire Type - Fits most standard lay-in lensed or parabolic housings 2X2' and 2X4'.

Lamps - 1 or 2 lamp T8 or T5 fluorescent wiring kits available.
